PROFESSIONAL SUMMARY

Aspiring Software Engineer with a builder's mindset and a researcher's curiosity. Currently pursuing BE Software Engineering at MUET while actively shipping and open-sourcing real projects across Java, C++, Python, and full-stack web technologies (HTML, CSS, JavaScript, PHP, MySQL). Recently launched a personal developer portfolio and maintains an active GitHub with projects spanning e-commerce UIs, data structures & algorithms, and full-stack systems. Contributed to Pakistan's AI future as a Data Curator for the SindhuGPT ASR Initiative — helping bring speech recognition to the Sindhi language. Gained hands-on exposure to organizational operations through a summer internship at Khushhali Microfinance Bank, Jacobabad. Experienced in leading teams, writing clean and maintainable code, and turning ideas into working software. Driven by the belief that the next generation of engineers from South Asia will shape the global tech landscape — and committed to being part of that change.

TECHNICAL SKILLS

Programming Languages:

Java | C++ | Python

Web Development:

HTML5 | CSS3 | JavaScript | Bootstrap | Responsive Web Design

Backend:

PHP

Database:

MySQL

CS Fundamentals:

OOP | Data Structures & Algorithms | Operating Systems |
Computer Networking

Developer Tools:

Git | GitHub | IntelliJ IDEA | VS Code

Data & AI:

Data Curation | Speech Data Annotation | ASR Dataset Preparation

Soft Skills:

Team Collaboration | Communication | Problem-Solving |
Attention to Detail | Time Management

PROFESSIONAL EXPERIENCE

Data Curator — SindhuGPT (SMC-Private) Limited

2026

Business Incubation Center, MUET, Jamshoro, Sindh

- Curated and annotated speech data for the **SindhuGPT ASR Initiative**, contributing to AI advancement for low-resource Sindhi language recognition.
- Collected, cleaned, and structured audio-text datasets to train AI language models, supporting preservation of Sindhi linguistic heritage.
- Maintained rigorous data quality standards, enabling more accurate and culturally representative ASR model outputs.
- Earned a Certificate of Completion from SindhuGPT in collaboration with the Business Incubation Center, MUET.

Summer Intern — Khushhali Microfinance Bank

2026

Jacobabad, Sindh, Pakistan

- Completed a summer internship focused on understanding how a financial institution operates end-to-end, gaining practical insight into organizational structure, workflows, and processes underpinning day-to-day business.
- Performed data entry and record-keeping tasks, accurately inputting and updating customer and transaction information while maintaining data integrity and confidentiality.
- Observed and documented departmental workflows across operations, helping identify how manual processes could be streamlined through digital tools and software solutions.
- Coordinated with branch staff to ensure timely and error-free processing of documentation, strengthening attention to detail and professional communication skills.
- Developed a practical understanding of how software engineering principles — process mapping, data structuring, and system thinking — apply within a real organizational environment.

PROJECTS

Personal Developer Portfolio

Technologies: HTML | CSS | JavaScript | Responsive Design | Deployed on Vercel

- Designed and shipped a modern, responsive personal portfolio website showcasing technical skills, featured projects, professional experience, certifications, and resume.
- Implemented a clean, developer-focused UI with smooth interactive animations and mobile-first responsive layout.
- Deployed and continuously updated via Vercel to reflect ongoing project and career progress.

OBR-QMS — Queue Management System

Technologies: HTML | CSS | JavaScript | PHP | MySQL

- Built a full-stack queue management system with a dynamic front-end and a PHP backend connected to MySQL.
- Implemented token generation, real-time queue tracking, feedback collection, and secure admin reporting features across responsive user interfaces.

Noor-ul-Quran — Digital Qur'an Platform

Technologies: HTML | CSS | JavaScript

- Built a free, ad-free website for daily Qur'an reading, covering all 114 Surahs and 30 Paras with Arabic text, translation, and audio playback.
- Added supporting features including Durood Paak, Ayat-ul-Kursi, the Four Quls, the 99 Names of Allah, and an interactive Tasbeeh counter.

Jacobabad City Guide

Technologies: HTML5 | CSS3 | JavaScript (ES6+) | Google Maps API | Vercel

- Built and deployed a live, dependency-free community website for the city of Jacobabad, Sindh — covering city history, 8+ landmark profiles, a video tour, and a categorized photo gallery.
- Integrated an interactive Google Map with smart search, a working contact form via serverless email delivery, and a light/dark theme toggle.
- Implemented SEO best practices (structured data, Open Graph tags, sitemap, robots.txt) with a fully responsive, mobile-first layout tested across devices.

EDUCATION

BE Software Engineering

Mehran University of Engineering and Technology (MUET), Jamshoro, Sindh | In Progress

Intermediate — FSc Pre-Engineering

Govt Boys High School, Jacobabad | 2024 | A1 Grade

CERTIFICATIONS

- Google AI Essentials — Coursera | 2025
- Google Prompting Essentials — Coursera | 2025
- Software Architecture — Coursera | 2026
- Introduction to Networking and Cloud Computing — Coursera | 2026

LEADERSHIP & ACHIEVEMENTS

- Served as Team Lead for multiple academic software projects, coordinating task distribution, code reviews, and deadline management across teams of 4–6 students.
- Achieved A1 Grade at Intermediate (FSc Pre-Engineering) level, demonstrating consistent academic excellence.
- Contributed to a nationally recognized AI research initiative (SindhuGPT) as an undergraduate student, supporting development of speech recognition technology for Sindhi.
- Maintains an active GitHub profile with multiple public repositories spanning full-stack development, DSA, and OOP projects.
