

SAQIB ANWAR

+92 334 9867384 | saqibabro595@gmail.com | Jacobabad, Sindh, Pakistan

PROFESSIONAL SUMMARY

Aspiring Software Engineer with a builder's mindset and a researcher's curiosity. Currently pursuing BE Software Engineering at MUET while shipping real projects across Java, C++, and full-stack web technologies. Contributed to Pakistan's AI future as a Data Curator for the SindhuGPT ASR Initiative — helping bring speech recognition to the Sindhi language at a time when inclusive AI has never mattered more. Gained hands-on exposure to organizational operations through a summer internship at Khushhali Microfinance Bank, Jacobabad. Experienced in leading teams, writing clean and maintainable code, and turning ideas into working software. Driven by the belief that the next generation of engineers from South Asia will shape the global tech landscape — and committed to being part of that change.

TECHNICAL SKILLS

Programming Languages: Java | C++ | Python

Web Development: HTML5 | CSS3 | JavaScript | Bootstrap

Backend: PHP

Database: MySQL

CS Fundamentals: OOP | Data Structures & Algorithms | Operating Systems | Computer Networking

Developer Tools: IntelliJ IDEA | VS Code | Git

Data & AI: Data Curation | Speech Data Annotation | ASR Dataset Preparation

Business Operations: Organizational Workflow Understanding | Data Entry | Record Maintenance

INTERNSHIP EXPERIENCE

Khushhali Microfinance Bank

Jacobabad, Sindh, Pakistan | Summer 2026

- Completed a summer internship focused on understanding how a financial institution operates end-to-end, gaining practical insight into how organizational structure, workflows, and processes underpin day-to-day business — a perspective directly relevant to designing real-world software systems.
- Performed data entry and record-keeping tasks, accurately inputting and updating customer and transaction information while maintaining data integrity and confidentiality.
- Observed and documented departmental workflows across operations, helping identify how manual processes could be streamlined through digital tools and software solutions.
- Coordinated with branch staff to ensure timely and error-free processing of documentation, strengthening attention to detail and professional communication skills.
- Developed a practical understanding of how software engineering principles — process mapping, data structuring, and system thinking — apply within a real organizational environment.
- Demonstrated professionalism and reliability by consistently meeting daily task deadlines within a structured, deadline-driven banking environment.
- Adhered to organizational policies and confidentiality standards while handling sensitive customer and financial data.

Data Curator — SindhuGPT (SMC-Private) Limited [\(Click to view certificate\)](#)

Business Incubation Center, MUET, Jamshoro, Sindh | 2026

- Curated and annotated speech data for the SindhuGPT ASR Initiative, contributing to AI advancement for low-resource Sindhi language recognition.
- Collected, cleaned, and structured audio-text datasets to train AI language models, supporting preservation of Sindhi linguistic heritage.
- Maintained rigorous data quality standards, enabling more accurate and culturally representative ASR model outputs.
- Awarded Certificate of Completion by SindhuGPT in collaboration with the Business Incubation Center, MUET.

PROJECTS

OBR-QMS — Queue Management System

Technologies: HTML | CSS | JavaScript | PHP | MySQL

- Built a full-stack queue management system with dynamic front-end (HTML, CSS, JavaScript) and a PHP backend connected to MySQL.
- Implemented token generation, real-time queue tracking, and admin reporting features.

Attendance Management System

Technologies: C++

- Developed a console-based attendance tracking system in C++ with student record management, date-wise attendance logs, and summary report generation using file handling.

Refrigerator Management System

Technologies: Java | OOP

- Built an inventory and monitoring system for managing refrigerator stock and status in Java.
- Applied core OOP design patterns including encapsulation and inheritance.

EDUCATION

BE Software Engineering

Mehran University of Engineering and Technology (MUET), Jamshoro, Sindh | In Progress

Intermediate — FSc Pre-Engineering

Govt Boys High School, Jacobabad | 2024 | A1 Grade

CERTIFICATIONS

Google AI Essentials | Coursera | 2025 [\(Click to view\)](#)

Google Prompting Essentials | Coursera | 2025 [\(Click to view\)](#)

Software Architecture | Coursera | 2026 [\(Click to view\)](#)

Introduction to Networking and Cloud Computing | Coursera | 2026 [\(Click to view\)](#)

LEADERSHIP & ACHIEVEMENTS

- Served as Team Lead for multiple academic software projects, coordinating task distribution, code reviews, and deadline management across teams of 4–6 students.
- Achieved A1 Grade at Intermediate (FSc Pre-Engineering) level, demonstrating consistent academic excellence.
- Contributed to a nationally recognized AI research initiative (SindhuGPT) as an undergraduate student, supporting development of speech recognition technology for Sindhi.
